I'M A LEADING EXPERT IN: primary eye care and specialty contact lenses. I began working as an ophthalmic technician at the age of 19 and fell in love with eye care. I love making a positive difference in my patients' lives – it's exciting.

MY MOST REWARDING MOMENTS AS A DOCTOR ARE: fitting patients with specialty contact lenses because they have corneal diseases like keratoconus. One of my most memorable cases was a young CPA who was struggling to see numbers. I fit him with sclerals, and he was able to go from 20/200 to 20/20 vision with the specialty lenses. It was extremely emotional because he had been to several specialists prior before randomly finding me, and he could not believe he could see again.

MY PATIENTS WOULD DESCRIBE MY CHAIRSIDE MANNER AS: personable and thorough. Patients tell me that I make them feel comfortable – and that is always my goal.

ONE PERSON I WOULD LIKE TO HAVE DINNER WITH: is Dr. Christine Sindt, the inventor of EyePrint Pro and a pioneer in scleral lenses. She has devoted her entire career to providing vision for patients who need specialty contacts and would be full of advice and words of wisdom as a female doctor and inventor.

I WISH MORE OF MY PATIENTS WOULD STOP: taking their eyes for granted. Your sight is one of your most precious senses, and they do not deserve the cheapest or easiest eye care and eye wear solutions.
